

The graph displays the Equal Error Rate (EER) for 20 individual ECGs and their mean over 40 iterations. The y-axis represents the EER, ranging from 0.00 to 0.10. The x-axis represents the number of iterations, ranging from 0 to 40. A red dot on the 'Mean' line at iteration 8 indicates the minimum mean EER value of 0.0271. The legend on the right lists ECG 1 through ECG 20, each represented by a different colored line. The 'Mean' line is shown in blue.
