

The graph displays the Equal Error Rate (EER) in percentage on the y-axis (ranging from 0.0 to 20.0) against the Number of ECGs on the x-axis (ranging from 0.0 to 20.0). There are 20 individual ECG series (ECG 1 to ECG 20) and a 'Mean' series. All series show a rapid decline in EER as the number of ECGs increases, stabilizing after approximately 10 ECGs. The 'Mean' series is highlighted with a thick blue line and a red dot at the final data point (20 ECGs). Text annotations indicate the 'EER MEAN = 0.049 %' and 'STD MEAN = 0.156 %'.
